SIDEROS ROTOCLEAN MINI (1125-2230025)

Control type
NC

Construction year
2026

Machine no.
1125-2230025

Make
SIDEROS

Location
49779 Niederlangen

Operating Principle
The compact, safe, and efficient deburring drums from
SIDEROS ENGINEERING, model â??ROTOCLEAN,â?? enable fast and
cost-effective removal of slag, burrs, scale, and rust from
oxy-fuel, plasma, and laser-cut parts while ensuring complete safety and ergonomics.
Our drums replace traditional, expensive, and dangerous manual
grinding processes. They are equipped with a safety guard
which completely encloses the rotating drum and protects the operator from any
dangerous contact with the machine.
The workpieces are held in a hexagonal drum that is completely
lined with a special wear-resistant rubber.
This significantly reduces the machineâ??s noise level and
prevents damage to parts that fall against the drum walls.
Rotation is driven by a large gearmotor and
enables thorough cleaning of the parts, either through tumbling
or rubbing, while the drum access door is equipped with hydraulic cylinders
that allow for quick and safe opening.

ADVANTAGES OF ROTOCLEAN

â?¢Higher productivity

â?¢Low operating costs

â?¢Reduced noise level

â?¢Reinforced construction

â?¢Safe operation

â?¢No maintenance required

â?¢Certified quality

â?¢Reduced costs for consumables

Machine Components

-Housing made of highly durable steel profiles and sheets.

-Hexagonal drum made of sheet steel, lined on the inside with wear-resistant and sound-absorbing rubber.

-1.5 kW gearmotor.

-Control box mounted on the housing.

-General protection in accordance with applicable standards for safe machine operation.

-400 V 50 Hz CE

Machine attributes

diameter:	632 mm
total power requirement:	1,5 kW
weight of the machine ca.:	650 kg
dimensions of the machine ca.:	1700 x 1008 x 1291 mm
drum contents:	158 L
weight max. in kg:	200 kg
