Stable turning

The HGK_Series has two synchronously working drive units that are used for ensure continuous rotation with stepless speed control. Of the Roller spacing can be increased and decreased manually using locking pins to achieve a large diameter range of the workpieces.

Characteristics:

- For rotating and positioning
- in the field of machine, container, plant and pipeline construction
- Two synchronously running drive motors
- Adjustable rotation speed.
- PU castors
- Adjustment is via bolts
- Remote control

Scope of delivery:

- 1x controller
- 1x driven unit
- 1x traveling unit
